## **The Company**

R. Alexander Associates, Inc. (RAA) is an environmental consulting company, specializing in composting and 'organics recycling' (e.g., pyrolysis, anaerobic digestion, granulation/pelletization, etc.). RAA has provided a range of technical services (e.g., facility design and odor evaluation, systems & equipment selection, etc.), but is acknowledged as a leader in compost and organic recycled product market research and development, and is respected for its expertise in product development, product quality issues and end use. RAA provides service throughout North America, and internationally, and is known for its practical experience, creative solutions and overall understanding of the composting and organics recycling industry.

Major services include:

- Compost Market Research, Assessments and Development
- Organic Recycled Product Market Research, Assessments and Development
- Biosolids Management, Product and Market Research and Development
- Organic Recycled Product Sales, Marketing and End Use Education/Training
- Product Development, Labeling and Registration
- Production Facility and Marketing Program Audits
- North American Composting / Organics Recycling Industry Market Research
- Plus, Other Services

RAA possesses over 40 years of experience working with a variety of organic recycled feedstocks and products. Let us put our experience and expertise to work for you.
